Feedback

As an avid Disney+ subscriber, I've had the opportunity to experience the platform's recommendation system firsthand, and I must say it has been quite impressive. The Disney+ recommendation system has exceeded my expectations by providing personalized content suggestions that cater to my viewing preferences and interests.

After checking the data product (<https://nuar.shinyapps.io/DataProduct1/>), I have some feedback, I believe this feedback will help to fine-tune the product in the future.

- a. Personalized Suggestions: Personalized suggestions on your data product may extend beyond individual preferences to include recommendations based on demographic information. This could include suggestions tailored for specific age groups, such as content suitable for children, teenagers, or adults.
- b. Recommendations from Multiple Disney Brands: Disney+ encompasses a vast library of content from various Disney-owned brands like Pixar, Marvel, Star Wars, and National Geographic. It can be considered in the future version of the data product.
- c. New Releases and Exclusive Content: May be the recommendation system to highlight new releases based on user preferences and viewing habits.

I want to express my gratitude to your team for their hard work, dedication, and commitment to excellence. I look forward to witnessing the continued success and evolution of the data product.

Best regards,

Muhammad Imrul Bahar
